# Programme - Wednesday and Thursday

The Business Meeting will be divided into two areas of focus:

**1** The theme of 'Connections' will bring everyone together in multiple ways. We will network, share experiences and insight with each other on the things that matter as individual lawyers and for our firms. We will touch on how to be more profitable, remuneration, AI use and how to maximise business opportunities in Asia Pacific.

**2** 'The Future of the Network' sessions will give you, the members, the chance to crystallise how the network develops in the coming years and what direction it takes, who we recruit as member firms and how we grow.

If you want to build invaluable connections, profit from insight and support and shape the future of MI, **you need to be at the AGM to take advantage of that and to have your say.**
